The tests in InSite were very useful, as well. They gave me a good feel for what to expect on the exam. On the PMP Exam I got a Proficient rating in Initiation, ,Executing, and Monitoring and Controlling. I also received Moderately Proficient in Planning and Closing.
- March 10th, 2016 - Lina Chapman; 4-Day PMP Exam Prep Student
I ended up taking the exam on the Friday of the week following class. I passed! I am really glad I took it quickly after class while everything was fresh. I think the Audio CD's were invaluable in reinforcing the overall framework and processes. I listened to the CD set once in the weeks before class, then again after class and it really helped the details from bootcamp solidify. Super important to reinforce understanding of the overall framework of Processes. The book was great too. I highly recommend that people get their materials shipped to them in advance, I think i got so much more out of the bootcamp since I had at least gone over the material once at a high level, and had some context.

Took the PMP today, killed it! The 3 practice exams on the Velociteach InSite are immeasurably more difficult than the actual exam.

Just to let you know, I passed the test yesterday – thank goodness!! I wouldn't want to take it again. Thank you for hosting the boot camp. It was a big help.
Harold, thanks again to Velociteach and you in particular for the course work! It obviously works. All 3 of the QPSE staff from the January course that have taken the test, have passed.
- February 25, 2016 – Bryan Keator Live 4-Day PMP Exam Prep Student
I wanted to say again how much the course helped me. Harold did a great job keeping the information interesting, understandable, and fun. Your website was also very helpful, the three practice tests helped me get ready for the grueling 4 hour exam. I felt like the questions on the practice tests were more difficult than the actual test, which is a good thing.

We have really liked their services and found them “Top Notch” in the industry. There are a lot of players in this field and we have a great experience with everything from pricing / award of subcontract, to client relations, to teacher knowledge, to classroom presentation and materials, to a nice combination of classroom and on-line instruction & testing, to PMP Certification pass success.

 Good evening, Bob. I wanted to take just a moment to thank you for all of your help over the past week. I took the PMP today for the first time and passed!!! I am very excited about that!!! When I signed up to take the test, I researched different study options available. After doing research, I thought that Velociteach would benefit me the most. I prepared for the exam using only VELOCITEACH. I followed the Insite program prior to the boot camp to prepare. Then I attended the 3 day PMP Boot camp that you caught. I finished the boot camp then took the PMP for the first time 2 days after the boot camp. The boot camp was an intense experience but VERY effective. The materials used in the class were awesome and very beneficial in my preparation. The book was excellent as were the CD's. Also, I cannot say enough about the job you did as the class instructor. You did a FANTASTIC job of leading the class and providing me with the information that I needed to pass. You also was able to do it while keeping the information interesting, thus keeping my attention. You are an excellent instructor. In a nutshell, I spent a total of 6 weeks studying for the PMP. I used the Velociteach Insite program for 5 weeks, I used the Velociteach "Pass the PMP" preparation kit and I attended the Velociteach 3 day boot camp. I took the PMP 2 days after the boot camp and passed with a proficient and 4 moderately proficients. I call that SUCCESS!!! Thank you so much for everything you have done to help.

 I was so impressed with the content, presentation and instructor. The webinar ran like clockwork, nice mixture of on/off time. Harold is a fantastic teacher, he related unfamiliar or difficult material to real-life case studies which was helpful.

It was a great learning experience. Thank you.

 I have to say that back in 2006 when I earned my CAPM, I used Andy Crowe's book and passed the 1st try. So when I decided to take the PMP, I immediately went looking for a PMP book by Andy Crowe. And, I was not disappointed. Such an easy and enjoyable read. I must say, I LOVED the CDs as well as the dialogue brings you into the PM world. I also enjoyed the Bootcamp with Instructor Greg Stevens. He is so encouraging. I did not really think the mindmaps were going to help me, but after reading Andy's (see I feel like we are friends calling him by first name) book again along with the mindmaps, all the light bulbs starting going off. Also, I like the insert that came with the kit. Oh, I can't forget

the video tutorials on Insite. I just love insite and I hated that my access expired. I guess I like everything, can't complain. I will admit that I did not really use the flashcards, but there's lots of information there as well.

Anyway, I'm sure I will be on Insite again, earning those PDUs. Thanks so much!!! I did move on to a new job in September (actually my previous employer who called me back), and they are very supportive when it comes to training.

Thank you again. I look forward to staying in touch!

I have really enjoyed my Velociteach experience and would be happy to provide a testimonial at any PMI meeting we are attending. I believe the material provided by Velociteach has really helped me refocus my efforts and given me a new way to look at the material.
I have not taken my exam, but I have really enjoyed the program. Cindy Hanafay was outstanding and made learning the material fun. The mind maps are a clever way of keeping a mental picture of the information together. InSite was great at reinforcing the course material and the Earned Value: Formula Map really makes keeping up with the formulas easy.
I wish you and your families a safe and happy holiday and look forward to seeing you at another PMI event.
Casey - Thank you so much for encouraging me to take the class. Worth every penny.

 - I actually took the 4-day PMP class; as intense as it was, I do not believe I would have learned as much in a 3-day setting just for the sheer volume of materials to cover. The instructor was very good and engaging; he was very knowledgeable on the subject matter. It is also important that he was able to provide "real world" PM/industry examples and not just theoretical material from a book. I enjoyed the class very much.

I had no lapses in concentration on the material and the instructor. He made the course interesting and entertaining. This is hard to do without losing something along the way. It may be because many of his stories were related to projects or leadership of projects in some form. It was very easy to relate to the instructor.

 - The variety of learning styles adults have were all served. Great design to insure possibility of success for every learning style.

 - The instructor made these 3 days bearable - great presence in the classroom, kept things moving along, able to engage on any question. I have already recommended him to a coworker.

Good information about the exam site conditions so we feel prepared for the rigor of a formal testing facility; it reduces test anxiety.
 - Harold was great! He was fun and though he was lecturing it did not feel like he was lecturing. He kept all the material relevant through sharing real life examples.
 - Instructor was well suited to adult learners, taking into account participants' experiences. He wasn't defensive if an error was pointed out in the material.
