Stakeholder Management: Plan Stakeholder Engagement

Data Representation: 3rd Paragraph changed to:

"The purpose of this chart is to chart the current and desired states of project stakeholders, which will inform the stakeholders engagement plan."

G

## Glossary of Terms

T

Definition of "Three-Point Estimate" changed to:

"A technique for estimating duration or cost. The three-point estimate uses a pessimistic, optimistic, and realistic estimate to calculate. The formula most often associated with the three-point estimate is a simple average, expressed as follows:

Estimate = (Pessimistic + Realistic + Optimistic) ÷ 3."
